Education

CUNY Graduate Center

New York, NY

Master of Science in Data Science | GPA: 3.75/4.0

December 2025

Relevant Coursework: Machine Learning, Data Mining, Artificial Intelligence, Big Data Analysis, Natural Language Processing, Audio Processing, Data Visualization

Hunter College

New York, NY

Bachelor of Arts in Computer Science

May 2023

Experience

Software Automation Engineer Intern

Feb. 2026 – Current

ULimo

New York, NY

- Scale Instagram client outreach by **900%** (1 to 10 contacts per session) by building Python automation bot with Map caching and Excel tracking integration
- Increase automated follower acquisition by **20%** (25 to 30 per run) by enhancing Instagram bot to auto-dismiss confirmation panels, reducing manual intervention

Projects

Olist ETL Pipeline Project (05/2026) | *Databricks, ETL, PySpark, Medallion*

[GitHub](#)

- Built end-to-end ETL pipeline using **Databricks Lakeflow Spark Declarative Pipelines** to process **100K+** orders across **8** CSV files following **Medallion** architecture
- Generated **15+** business intelligence metrics through **AI/BI** dashboards and leveraged **Genie AI** to perform customer sentiment analysis and extract actionable insights

HVAC Business Automation System (02/2026) | *n8n, Notion, Llama3.1, Gmail API*

[Portfolio](#)

- Eliminated manual client intake by building an end-to-end **n8n** workflow that captures form submissions, classifies inquiry type using **Llama 3.1**, and logs structured records into **Notion CRM** automatically
- Reduced client response time by **< 1** minute by integrating an **AI Agent** that generates and sends personalized confirmation emails via **Gmail** upon every form submission
- Enabled consistent AI output parsing by building a custom **JavaScript** Code node that transforms multi-line **Llama 3.1** responses into discrete structured fields for downstream **Notion** and **Gmail** nodes

Compliance Assistant (01/2026) | *Python, ChromaDB, Ollama, Streamlit*

[GitHub](#)

- Build RAG pipeline for FDA pharmaceutical compliance guidance processing **20+** regulatory documents into **471** indexed chunks using **LangChain** for orchestration and **PyPDF** for document ingestion
- Optimize document retrieval accuracy by implementing **ChromaDB** vector database with fixed-size chunking strategy for semantic search
- Containerize and deploy application with **Docker** and **Streamlit** providing user-friendly compliance query interface

Technical Skills

Languages: Python, SQL, JavaScript, HTML/CSS

Frameworks & Tools: Databricks, n8n, Notion, Ollama, Pandas, NumPy, Matplotlib, Pytorch, Scikit-learn, Transformers, XGBoost, Langchain, HuggingFace, ChromaDB, Docker, Streamlit, GitHub Actions (CI/CD)

Certification: Google Data Analytics Professional Certificate

Activity

Student - CodePath Android Development

Jan 2021 - April 2021

- Won **2nd** place in capstone competition by collaborating with 2 teammates to develop MeloCommunity, a music streaming app with social features including playlist control and comment section using **Java** and **Android SDK**
